

IT Organization Changes

Strategic Advisory Council
March 1, 2006

Presented by:

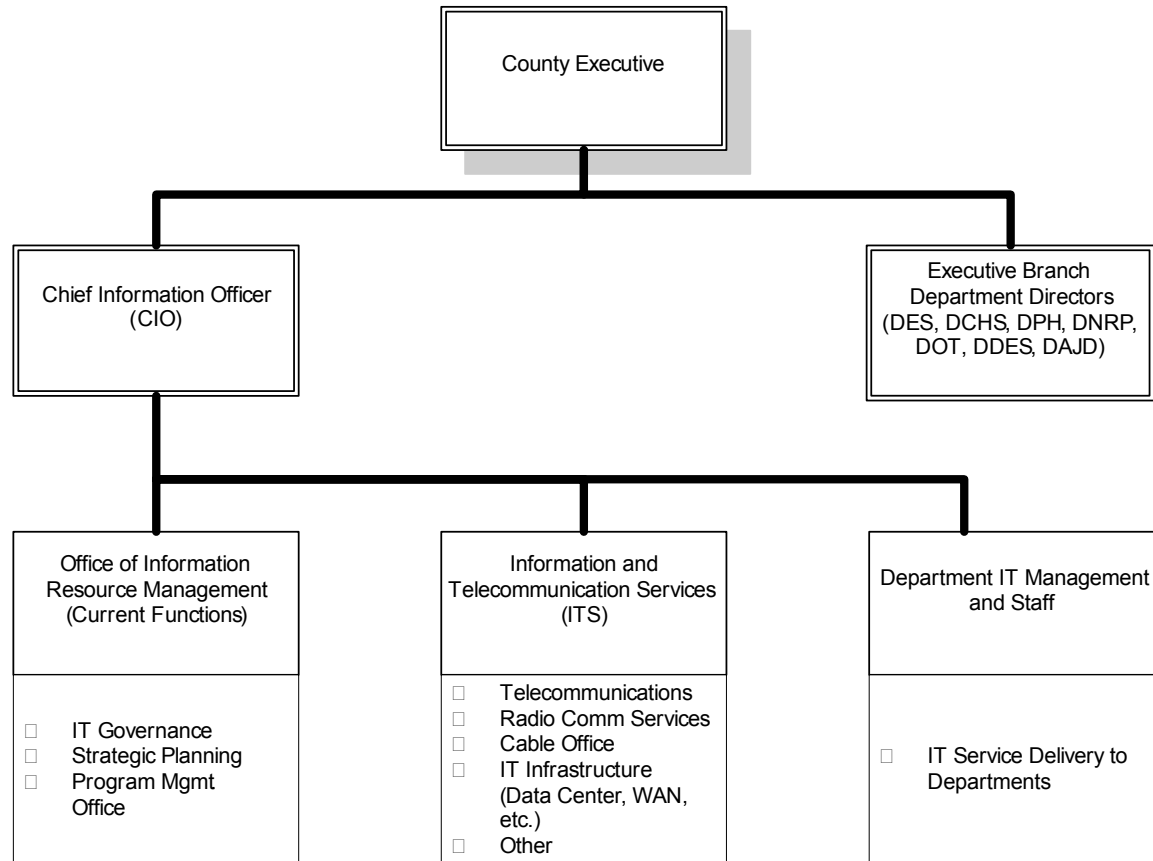

Ron Sims

IT Organization Changes

Executive Recommendation (Executive Branch Only)

Highlights and Benefits

- Consolidates Executive branch IT functions under the CIO in 2006.
- Establishes a clear line of authority and accountability for planning, management, and oversight of IT.
- No facility changes are needed for existing IT staff.
- Authorizes the CIO to validate and take responsibility for achieving improved security and reliability of services as well as the \$34 million savings identified by the consultant.
- Future work will identify and recommend a consolidated countywide IT organization that further considers and best meets the needs of the separately elected agencies.
